

Learning & Intelligent Systems – Project Information/Schedule

Where?

Everything will be made available online at <https://project.las.ethz.ch/>. We will announce when the server will be online by email. You will need to be in the ETH network or use the VPN to access the server.

When?

We will announce when the server will be online by email. You may then solve an ungraded dummy task. This allows you to get familiar with the whole process (signing into the server, forming a group, reading the task description, submitting solutions and handing in the task) without any pressure. While this is optional, we strongly advise you to do so. After the dummy task, there are four graded tasks that are equally weighted. The following schedule provides you with an overview of the hard deadlines:

| | Task release | End of submissions | Final hand in until |
|----------------------------|----------------------------|----------------------------|----------------------------|
| Ungraded dummy task | Mar 14 th , 8pm | Mar 21 st , 8pm | Mar 23 rd , 8pm |
| Task 1 | Mar 21 st , 8pm | Apr 4 th , 8pm | Apr 6 th , 8pm |
| Task 2 | Apr 4 th , 8pm | Apr 18 th , 8pm | Apr 20 th , 8pm |
| Task 3 | Apr 18 th , 8pm | May 9 th , 8pm | May 11 th , 8pm |
| Task 4 | May 9 th , 8pm | May 30 th , 8pm | Jun 1 st , 8pm |

Do you provide deadline extensions?

It is your responsibility to hand in the tasks properly and on time. We neither send reminders nor grant deadline extensions.

Are groups allowed?

You are allowed to work in groups of 1-4 students, but it is your responsibility to find a group. You may find team mates before/after the lecture/exercise session or use the “Find a group functionality” at <https://project.las.ethz.ch/>. You may use the same group for all tasks or choose different groups for the different tasks. All details on signing up as a group will be available at <https://project.las.ethz.ch/>.
